Increasing the Value of an Ames, IA home

June 27, 2019

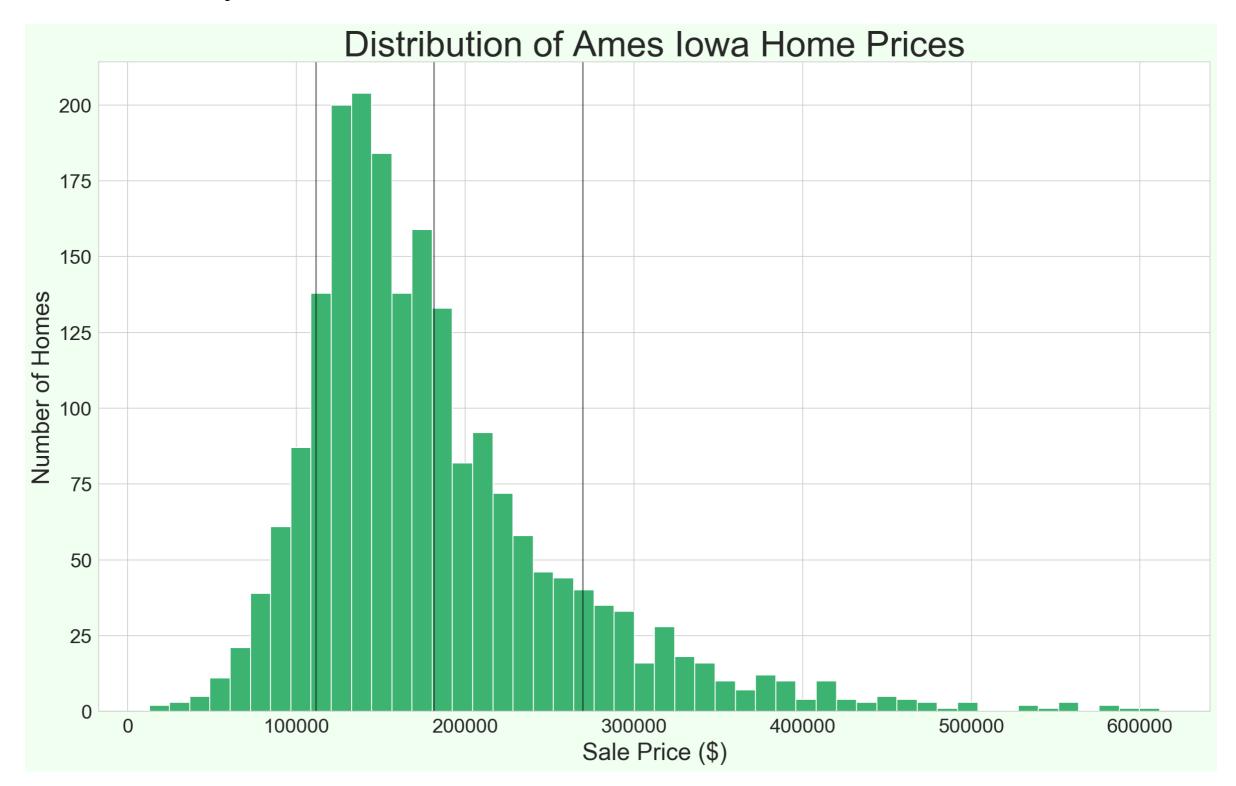

Overview

- Summarize Ames, Iowa sale prices
- Understand how we can predict sale prices
- Investigate modifiable home features which may increase sale price. These include:
 - Overall quality
 - Recent remodel
 - Attached garage
 - Paved Driveway

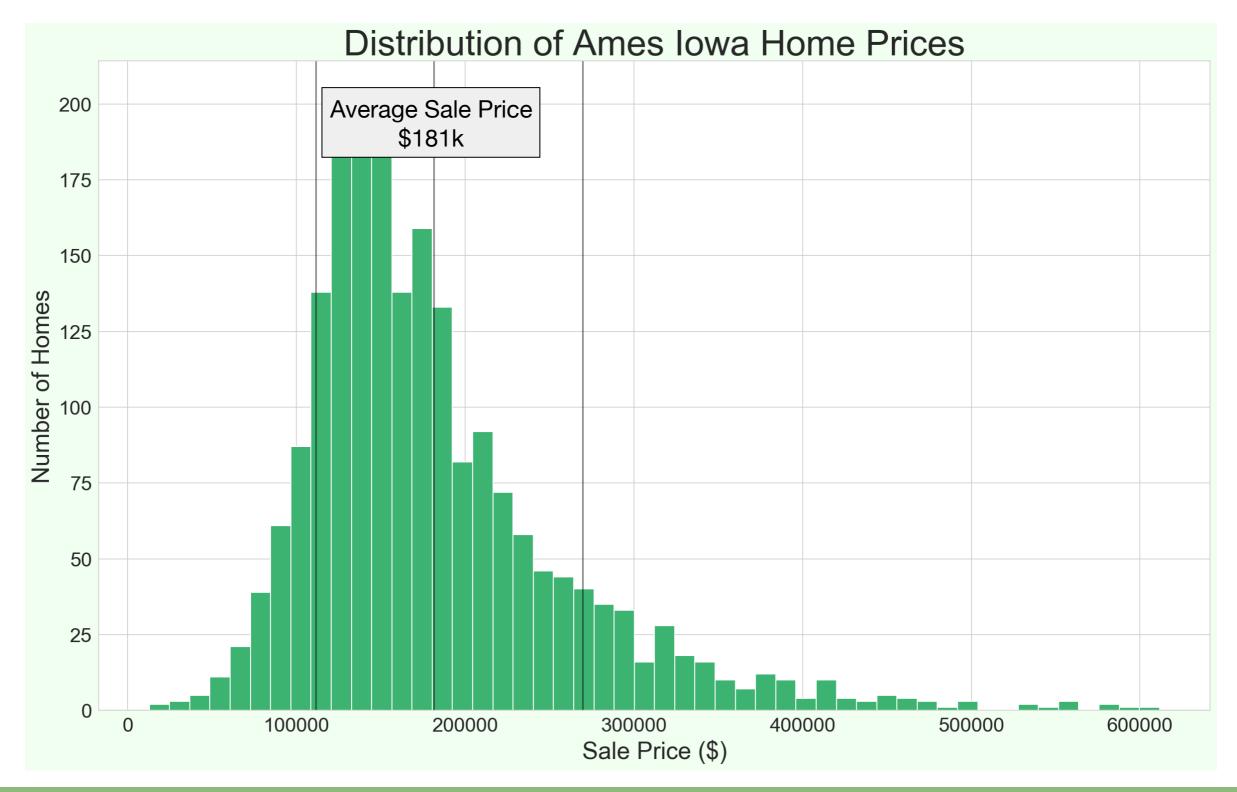

Ames Iowa Market at a Glance

 With a broad range of home values in the city of Ames, it can be hard to know what your home is currently worth.

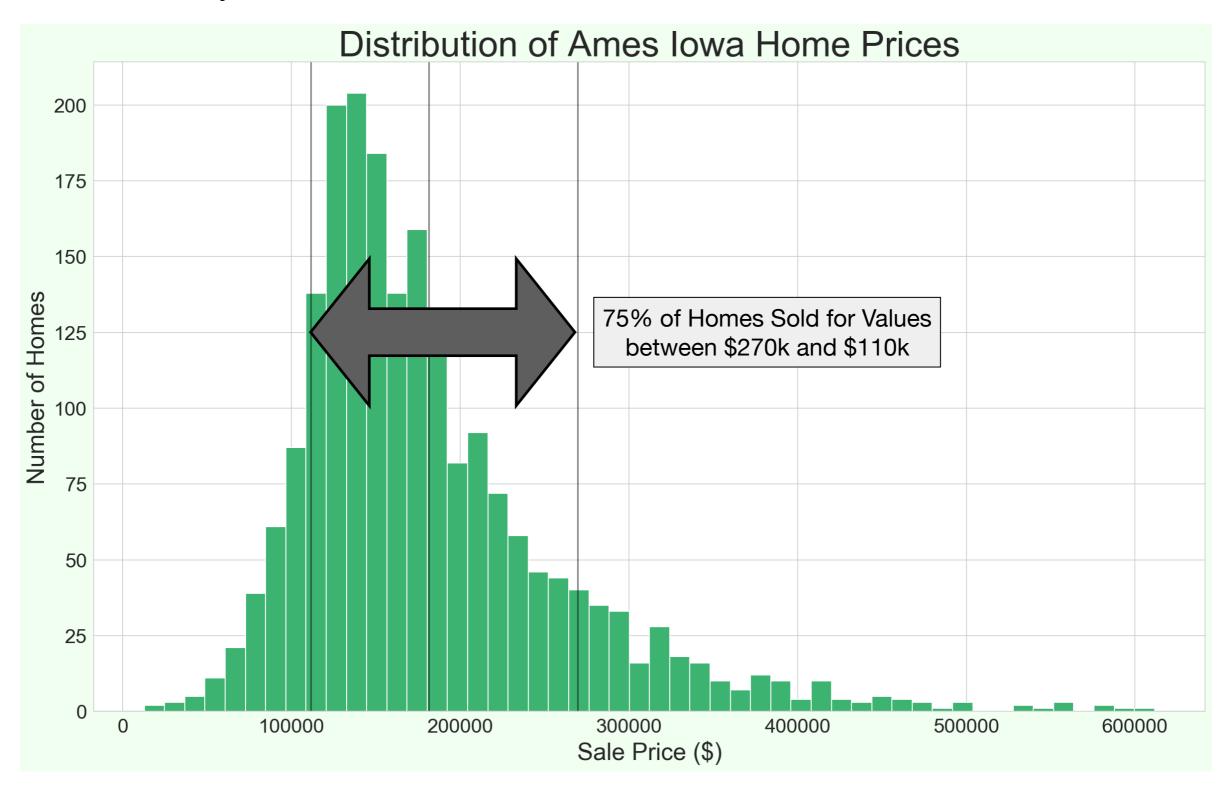

Ames Iowa Market at a Glance

 With a broad range of home values in the city of Ames, it can be hard to know what your home is currently worth.

Ames Iowa Market at a Glance

 With a broad range of home values in the city of Ames, it can be hard to know what your home is currently worth.

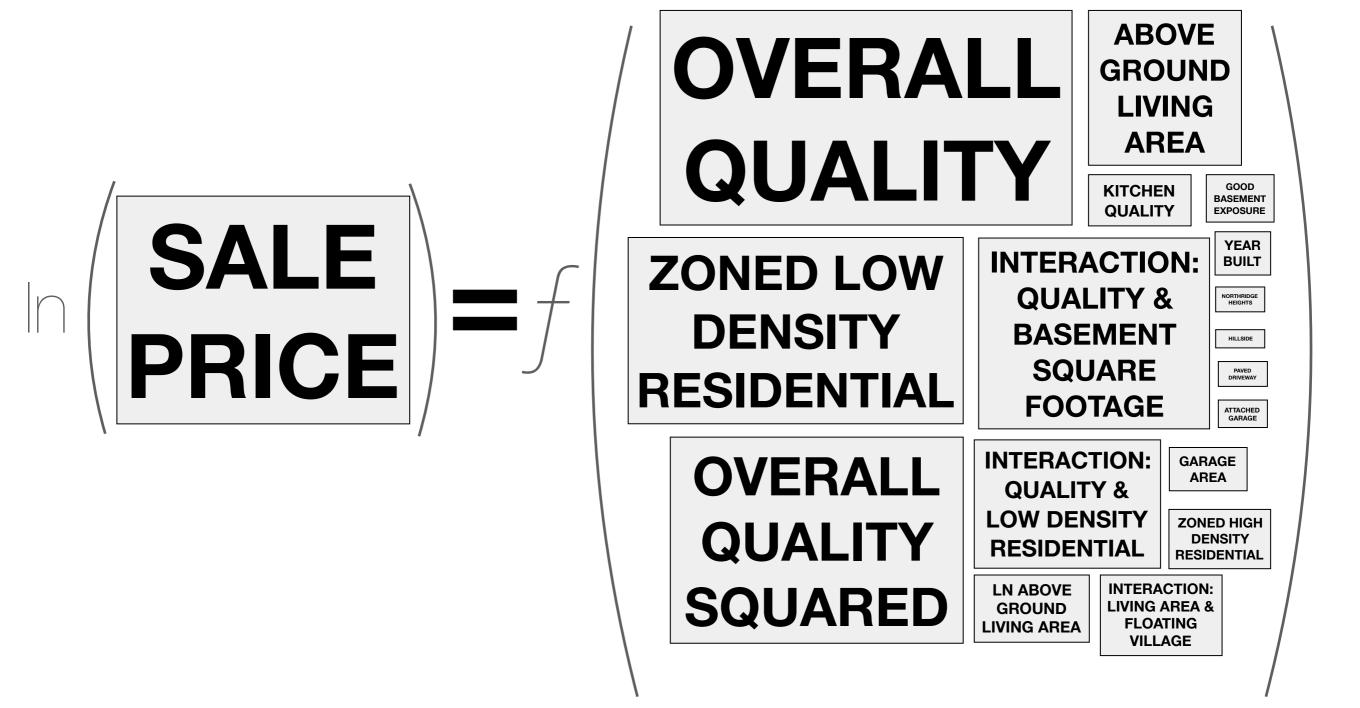

• Using 13 attributes of a property - and 7 interactions between them - I created a model to predict the value of a home.

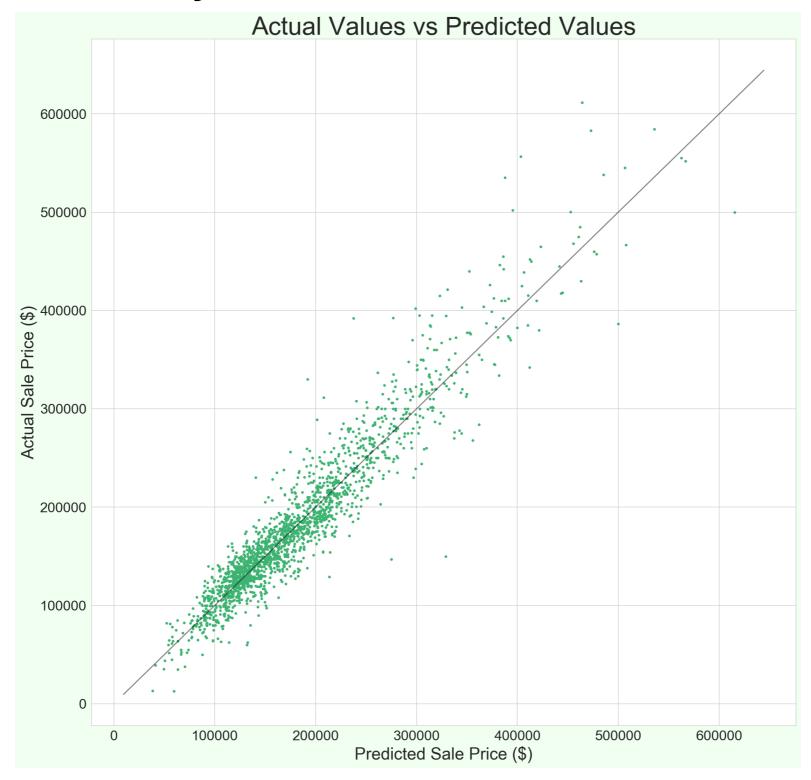

• Using **13 attributes** of a property - and **7 interactions** between them - I created a model to predict the value of a home.

re Description	Feature
al Overall Quality of Home, scale from 10 (Very Excellent) to 1 (Very Poor), unmodified from original dataset	overall_qual
ilt Original Construction Year, unmodified from original dataset	year_built
Exterior Condition, scale from 5 (Excellent) to 1 (Poor), modified from original dataset	exter_cond
re Good = 1, Less than good exposure or no basement = 0, modified from original dataset	bsmt_exposure
ea Above Ground Living Area in Square Feet, unmodified from original dataset	gr_liv_area
al Kitchen Quality, scale from 5 (Excellent) to 1 (Poor), modified from original dataset	kitchen_qual
ea Garage Area in Square Feet, unmodified from original dataset	garage_area
re Fully Paved Driveway = 1, Partially Paved, Unpaved or No Driveway = 0, modified from original dataset	paved_drive
Sale Price of Home, unmodified from original dataset	saleprice
ge Built In or Attached = 1, All other types or none = 0, modified from garage_type	attached_garage
w Zoned as Low Density Residential = 1, Otherwise = 0, modified from ms_zoning	residential_low
er Zoned as Residential: Medium Density, High Density or Park = 1, Otherwise = 0, modified from ms_zoning	residential_other
ts Located in Northridge Heights = 1, Otherwise = 0, modified from neighborhood	northridge_hts
ea Natural Log of gr_liv_area Variable	log_gr_liv_area
al Square of overall_qual	square_overall_qual
rl Interaction between overall_qual and residential_low	inter_qual_rl
fv Interaction between gr_liv_area and floating_village	inter_area_fv
sf Interaction between overall_qual and total_bsmt_st	inter_qual_bsmt_sf

• Using 13 attributes of a property - and 7 interactions between them - I created a model to predict the value of a home.

• The estimate from this model will explain a property sale price's difference from the average sale price accurately over 90% of the time.

- You could petition to change the zoning of your location, but that would be a long and difficult process.
- Worse, you might find that even with different zoning, your home is still valued as though in its previous zoning.

- You could petition to change the zoning of your location, but that would be a long and difficult process.
- Worse, you might find that even with different zoning, your home is still valued as though in its previous zoning.
- If you have the land available, you can add square footage by building out. This typically isn't too costly and allows you to live in your home, but you will lose backyard space and could encounter zoning issues.*
- You could build another floor, but this is typically expensive and requires you to move out of your home.
- On average, this costs of an addition are 10% more than a remodel

Quality Improvements - Further Investigations

Attached Garage

Driveway Type

- Our violin plots appear to indicate that depending on the current quality and value of a home, the impact of any given change will be more or less dramatic.
- I would like to look more closely at how current home condition plays a role in what changes make the most sense

Further Research

- In conjunction with looking at how existing home quality changes the impact of a remodel, I would include more variables for home changes.
- Costs given for each change were based on limited internet research and were average amounts. Information available to us in this data set can likely also predict the cost of making a change to a home. To give the best advice, I would want to model the cost of a change relative to the home as well.

Conclusion

- Ames Iowa Housing Market:
 - Homes sell for \$181,000 on average
 - Distribution has a right skew
- Predicting sale prices
 - Overall quality, zoning and usable home area are the biggest factors in predicting a home sale price
- Improving overall quality is the most straightforward way to increase home sale price
 - Remodeling improves quality and sale price, but likely is not worth the cost
 - Adding an attached garage improves quality and sale price and is worth the cost
 - Paving a driveway improves quality and sale price and is worth the cost
